Interact with the frontend for all functionalities for food tracking system

Interacting with the frontend of a food tracking system typically involves managing various functionalities related to food intake, tracking, and analysis. However, since I can't directly interact with the frontend here, I can help guide you on how to create some common functionalities for a food tracking system. Below are some general examples of the functionalities and how you can implement them:
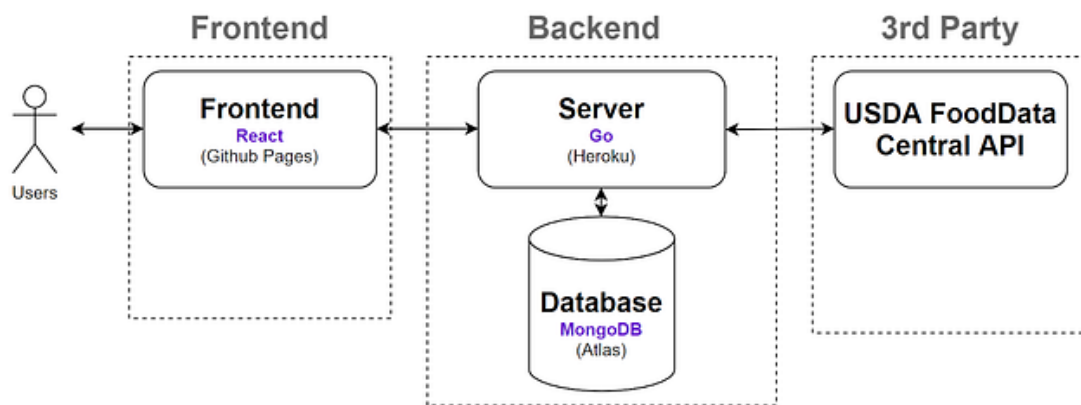

HTML:

```
<div class="main">
    <h1>Place Your Order Here!</h1>
    <form action="javascript:void(0);">
        <fieldset>
        <legend><div class="number">1</div> Your Info:</legend>
        <label for="name">Name:</label><br>
<input type="text" id="name" name="user_name"><br>
        <label for="mail">Email:</label><br>
<input type="email" id="mail" name="user_email"><br>
```

```
        <label for="phone">Phone:</label><br>
    <input type="tel" id="phone" name="user_tel"><br>
        <label for="address">Address:</label><br>
        <textarea></textarea>
    </fieldset>
    <fieldset>
        <legend><div class="number">2</div> Pasta Choice:</legend>
        <input type="radio" id="spaghetti"
name="pasta"><label>Spaghetti</label>
        <input type="radio" id="penne"
name="pasta"><label>Penne</label><br>
        <input type="checkbox" id="glutenfree"
name="glutenfree"><label>Gluten Free?</label>
    </fieldset>
    <fieldset>
        <legend><div class="number">3</div> Filling Choice:</legend>
        <input type="radio" id="mince" name="filling"><label>Meatless
Mince</label>
        <input type="radio" id="lentils"
name="filling"><label>Lentils</label>
    </fieldset>
        <fieldset>
            <legend><div class="number">4</div> Your
Sides:</legend>
        <input type="radio" id="bread" name="side"><label>Garlic
Bread</label>
        <input type="radio" id="nobread" name="side"><label>No Garlic
Bread</label><br>
            <input type="checkbox" id="glutenfree"
name="glutenfree"><label>Gluten Free?</label>
    </fieldset>
    <fieldset>
        <legend><div class="number">5</div> Extra Fillings:</legend>
        <input type="checkbox" id="mushrooms"
name="mushrooms"><label>Mushrooms</label><br>
        <input type="checkbox" id="onions"
name="onions"><label>Onions</label></br>
    <input type="checkbox" id="carrots"
name="carrots"><label>Carrots</label></br>
```

```html
<input type="checkbox" id="celery" name="celery"><label>Celery</label></br>
<input type="checkbox" id="peas" name="peas"><label>Peas</label></br>
    </fieldset>
<fieldset>
    <legend><div class="number">6</div> Any Allergies/Special Requests:</legend>
<textarea></textarea>
</fieldset>
<input class="button" type="submit" value="Give me Food!" onclick="submitForm()">
</form>
</div>
<div class="order">
    <h1>Thanks for your order!</h1>
    <img src="https://i.imgur.com/O0oqbwc.jpg">
</div>
```
